Hi, I'm Jimoh Tajudeen, a passionate Frontend Developer with a solid foundation in building responsive, accessible, and visually appealing web applications. With a deep understanding of modern frontend technologies like **HTML5, CSS3, TailwindCSS, Boostrap JavaScript (ES6+), and popular frameworks like React.js and Next.js**, I create intuitive and dynamic user interfaces that enhance user experience.

💼 PROFESSIONAL EXPERIENCE

2022 January – present
Abuja, Nigeria

Bynalab Hub, Front-end Developer
As a frontend developer, I focus on creating intuitive, visually appealing, and accessible user interfaces while ensuring fast load times and smooth performance across devices. I've successfully enhanced user engagement by improving mobile usability, optimized websites for cross-browser compatibility, and integrated dynamic features through API connections. By collaborating in Agile teams, I've contributed to delivering high-quality web applications on schedule, and through my code refactoring efforts, I've significantly increased the maintainability and scalability of the projects I've worked on.

2021 March – 2021 December
Lagos, Nigeria

Rotitech, Front-end Developer
As a frontend developer, I specialize in building responsive, high-performance web applications, optimizing user interfaces for seamless cross-device experiences, and integrating APIs for real-time data functionality. I've improved page load speeds by 30%, boosted mobile traffic by 40% through responsive design, and ensured accessibility compliance, raising scores by 27%. My contributions to cross-functional teams in Agile environments have helped launch complex platforms on time, while mentoring junior developers and reducing technical debt by 50% through code refactoring initiatives.

🎓 EDUCATION

2016 September – 2021 September
Lapai, Niger, Nigeria

**Bachelor of Science in Mathematics,
Ibrahim Badamasi Babangida University**

🧠 SKILLS

HTML5 & CSS3
Strong foundation in semantic HTML and modern CSS techniques like Flexbox, Grid, and responsive design for building clean, accessible, and scalable web layouts.

React.js / Vue.js/ Next.js
Expertise in using popular JavaScript frameworks to build reusable components, manage state, and create fast, interactive user interfaces.

Version Control (Git)
Experience with Git for tracking code changes, collaborating in teams, and managing project versions efficiently.

API Integration
Experience working with RESTful APIs and GraphQL to fetch, update, and manage data, integrating it smoothly into frontend applications.

JavaScript (ES6+)
Proficiency in modern JavaScript features, such as arrow functions, destructuring, promises, and async/await, for creating dynamic, interactive web applications.

Responsive Web Design
Ability to create web pages that adapt seamlessly across various devices (mobile, tablet, desktop) using media queries and responsive frameworks.

CSS Frameworks & Preprocessors
Proficient in frameworks like **TailwindCSS**, **Bootstrap**, and preprocessors like **Sass** to speed up development and maintain consistent styling.

Testing and Debugging
Experience with frontend testing frameworks like **Jest** or **Cypress** to write unit, integration, and end-to-end tests, ensuring the stability and reliability of applications.

🔨 FAVORITE QUOTES

"As a front-end developer, I turn ideas into interactive, responsive realities—where every pixel has a purpose and every line of code enhances the user's journey."

"Every line of code I write serves a purpose—to create fluid, responsive interfaces that engage users and bring ideas to life."
